

Prepared Microscope Slide Views

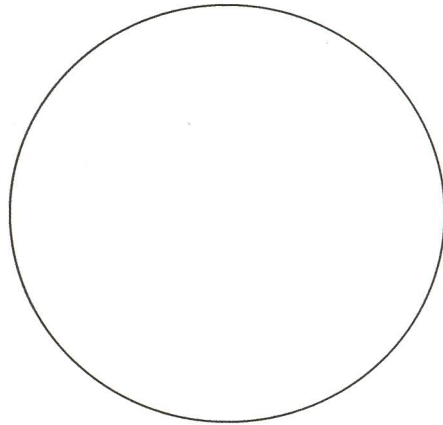

Name _____

Date _____ Period _____

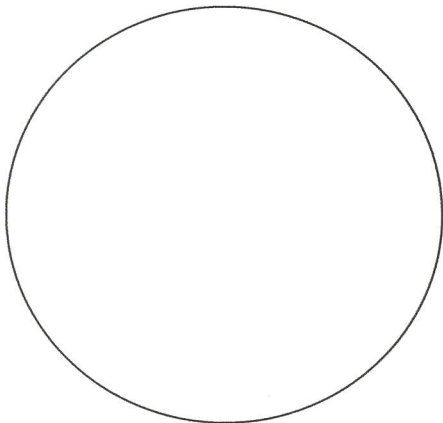

Choose a **minimum of 3 different slides** from the practice slide box. View them on low and medium power. Decide which view shows the best detail to someone who has not looked through a microscope. Draw this view in pencil then color it carefully. Include a title and total magnification under the drawing. Label parts of the drawing only if you **KNOW** what the structure is. Your work will be evaluated using the scientific drawing rubric shown in class.

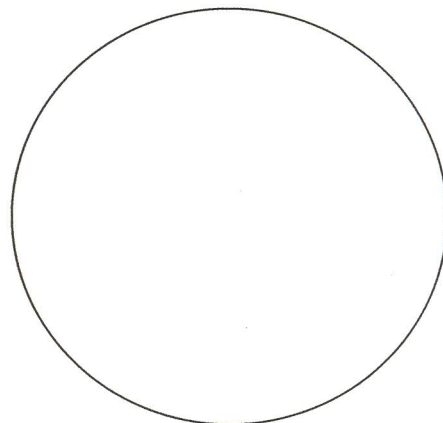

1. _____

2. _____

3. _____

4. _____

Using qualitative observations summarize what you saw in your favorite slide below:
