

Any time a group of curious people get together they want to know more about each other. Sometimes this is not an easy task to accomplish. In this investigation you will use the methods of science to learn more about the people in your classroom. You will be working together often this year and you may find this information useful for understanding each other. As you work together and after the activity is finished, think about what you learned about your classmates, what your classmates have in common, and also what opportunities there are to learn new things from your classmates.

Working Environment: Work individually first and then in a group of 2. You will need to be at a table. When you work with your partner, think about ways to share ideas with each other.

Procedure: Answer these questions at the right as homework or in your notebook.
Your teacher will tell you what to do.

1. What did you weigh at birth?
1. What is your favorite ice cream flavor?
2. What is your favorite musical group?
3. What is your favorite after school activity?
4. What is your favorite television program?
5. What is your favorite color?
6. If you could travel to any country in the world which one would you visit?
7. What is the best movie you have seen this year?
8. If you could instantly speak another language what would that language be?
10. In your family what is the order of your birth? First (or oldest), second, third, fourth etc.?
11. What is your favorite book?
12. What color are your eyes?
13. If you could have any animal as a pet what would you chose as yours?
14. What month were you born in?
15. If you could have a part-time job after school what would you want to do?
16. If you were a teacher what subject would you want to teach?
17. If you were able to pick your own first name what would it be?
18. If you were elected President of the United States what would be the first thing you'd do as president?
